Below you will find images containing each page of my website. I went for a simple professional design rather than something flashy. I did not upload a picture of myself because I do not have a professional headshot of myself yet. I will work on this and upload it for my own personal use in the near future. Thank you for the opportunity to make this project. It will be extremely useful in the future.

About Me

Hello! My name is Amir Hassan, and I am an aspiring Cybersecurity Specialist. I have a background in Computer science and a deep interest in Cybersecurity. Over the years, I've honed my skills in Cybersecurity through my coursework, and certifications.

In addition to my professional life, I enjoy playing sports like soccer and snowboarding. I'm passionate about Cybersecurity and always strive to grow and improve.

Feel free to explore my resume to learn more about my qualifications and achievements:

My Projects

Echo Server

This project was a small project I wrote in C using TCP. It's an echo server that echos back whatever the client sends.

View Details

Collatz Conjecture

This project implements a program to test the Collatz conjecture, optimizing step calculations with configurable caching policies (LRU, LFU, FIFO, MRU, or Random Replacement) and analyzing performance using timing tools and Google Sheets.
